

# Understanding Riding Hat Standards

Equestrian riding hat standards focus on rider safety. Helmets meeting these standards go through tough tests to ensure they protect well against falls and impacts. Certified hats provide better head protection, making riding safer. In your riding hat, you will have labels relating to which type of riding accident scenarios your helmet has been tested for.

|                                   | FLAT IMPACT | HAZARD EDGE IMPACT | SPIKE | CRUSH RESISTANCE | HEMISPHERE ANVIL | HORSESHOE ANVIL |
|-----------------------------------|-------------|--------------------|-------|------------------|------------------|-----------------|
| <b>SNELL E2016 &amp; E2021</b>    |             |                    |       |                  |                  |                 |
| <b>PAS015 2011</b>                |             |                    |       |                  |                  |                 |
| <b>EN1384 2023</b>                |             |                    |       |                  |                  |                 |
| <b>VG1</b>                        |             |                    |       |                  |                  |                 |
| <b>ASTM F1163 2015 &amp; 2023</b> |             |                    |       |                  |                  |                 |

2023 ONLY

## Your hat chooses you

Country & Stable advises all riders to have their helmets measured and fitted by a trained professional. Visit our store and let one of our expert team members help you find the perfect fit!

**Find us at: 19 Stilebrook Road, Olney, Bucks MK46 5EA**
