Engineered for Safety

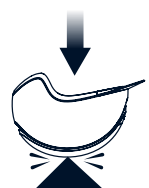

FLAT ANVIL

Simulates a flat surface impact (like hitting the ground)

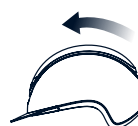

CRUSH TEST

Measures how much force the helmet can withstand

HAZARD EDGE

Simulates hitting a sharp edge (like a fence post)

ROLL OFF - STABILITY

Checks the helmet does not come off during a fall

SPIKE TEST

Simulates a pointed object (like a horse hoof)

RETENTION - STRENGTH

Checks the straps do not break in an impact

HELMET CONDITIONING

Tested to extreme environments that may include:

+50°C

-20°C

WET

UV
